Petkov^{1,2}, V. S. Romanenko¹, G. I. Rubtsov¹, S. V. Troitsky¹, A. F. Yanin¹, Ya. V. Zhezher¹, K. V. Zhuravleva¹.

Acknowledgements

Experimental work of *Carpet–2* is performed in the laboratory of “Unique Scientific Installation – Baksan Underground Scintillating Telescope” at the “Collective Usage Center – Baksan Neutrino Observatory of INR RAS” under support of the Program of fundamental scientific research of the RAS Presidium “Physics of fundamental interactions and nuclear technologies”. The work of a part of the group (DD, EG, MKh, NK, AUK, ANK, AL, OM, AY) on the upgrade of the installation was supported in part by the RFBR grant 16-29-13049. The work of DD, ID, AUK, ANK, AL and VP on PeV gamma rays from Crab was supported in part by the RFBR grant 16-02-00687. The work of ST and KZ on PeV gamma rays from extragalactic sources (Mrk 421, Mrk 501) in the context of constraining the anomalous transparency of the Universe was supported by the Russian Science Foundation, grant 18-12-00258. Monte-Carlo simulations have been performed at the computer cluster of INR Theoretical Physics Department.
